Assignment # 3

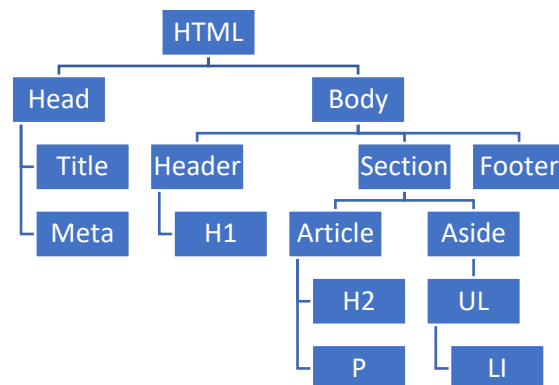

Problem 1: [CLO3]

Provide the following binary tree:

- Write the DFS Pre-order Traversal of the tree step by step.
- Write the DFS In-order Traversal of the tree step by step.
- Write the DFS Post-order Traversal of the tree step by step.
- Identify the root node and leaf nodes in the tree.
- Mention the ancestors of Math and descendants of Engineering.
- Compute the height of the tree.

Problem 2: [CLO3]

- i. Identify the root node and leaf nodes in the tree.
- ii. Write the DFS Pre-order Traversal of the tree step by step.
- iii. Write the DFS In-order Traversal of the tree step by step.
- iv. Write the DFS Post-order Traversal of the tree step by step.
- v. Perform BFS Level-order Traversal of the tree step by step.

Problem 3: [CLO3]

Provide the following binary tree representing a mathematical expression:

- i. Write the in-order traversal of the tree and explain the resulting expression.
- ii. Write the pre-order traversal of the tree and explain the resulting expression.
- iii. Write the post-order traversal of the tree and explain the resulting expression.
